After 10 years we are going back to the origins, in Tuscany where the very first MRI veterinary medicine meeting was held.

Over the past decade, Esaote has confirmed its commitment to the evergrowing Vet MR community, which has actively taken part in the development of MRI solutions for veterinary clinical applications.

This year's meeting aims to consolidate the relationships forged so far and foster the exchange of ideas and expertise amongst Esaote's valued users and veterinarians interested in our technology.

An extraordinary venue has been chosen as the backdrop to a rich scientific programme based on small animals and equine MRI, offering advanced training and practical guidelines on the use of MRI in this field.

See you in Tuscany!
